

The new facelift of the Phillip FX365 platform now comes with tighter security measures to ensure a secure trading experience for all our clients. We will be adopting certificate authentication to bind your preferred terminal with the set of unique login details assigned to you.

Please kindly note that the certificate resides only in the workstation that the process below is carried out on. Also, each set of unique login details can only be renewed and/or installed on one designated workstation.

One user cannot have multiple certificate installed, hence, our recommendation would be to renew and/or install the certificate on the workstation that you use most frequently. The first time the process is carried out would constitute an installation of the certificate. Subsequently, on an annual basis (upon notice), you are required to carry out the process again for renewal.

Below is a step-by-step instruction of the installation/renewal process:

1. Enter the following URL in your browser: <https://pret-dl.currenex.com/enroll-pret/enroll.html>
2. Check the box "I have read and accepted my client agreement and the privacy policy" after reading through the terms carefully
3. Click on the login field and input your FX365 login ID
4. Proceed to the PIN field and input the following "phillip123"
5. Kindly ignore the email field
6. Keep the default settings under the "Crypto Provider" field
7. Click on "Enroll" to complete the process.

Browser Certificate Request and Installation

Enrollment Request

Please complete all information below to begin your enrollment. When notified and asked to pickup your certificate, please be sure to use this browser on the same computer.

Please review your client agreement and the [privacy policy](#), then check the box if you accept the terms. You cannot continue with the enrollment process if the box is not checked.

1 I have read and accepted my client agreement and the privacy policy.
